

The Astonishingly Easy Capacity-Based Cloud Storage

Starting at 20TB for one, two, or three year terms.

Solution Overview

Backblaze B2 Reserve offers capacity-based object storage made for building applications, safeguarding data, and doing more with ease. Sold through our channel ecosystem, Backblaze B2 Reserve provides predictable pricing and scalability for your customers that includes the following:

- **Universal Data Migration (UDM):** Migrate from any data source to Backblaze B2 Cloud Storage.
- **Egress and Transaction Calls:** No added costs to retrieve data.
- **Tera Support:** Upgraded support plan with a four-business-hour target response time.
<https://www.backblaze.com/customer-support-options.html>
- **Server-Side Encryption (SSE):** Protects data by encrypting it before storing it on disk.

About Backblaze

Backblaze is a leading independent cloud provider that makes it astonishingly easy for businesses to store, use, and protect their data. Its B2 Cloud Storage platform offers always-hot, S3 compatible object storage that's readily available through APIs, ISVs, CLI, and a web UI. With a tech stack agnostic approach that integrates with companies' existing workflows and preferred compute and CDN tools, the platform fits multicloud, hybrid cloud, and other IaaS strategies. Enterprises in more than 175 countries use Backblaze to host content, build and run applications, manage media, backup and archive data, and protect and recover from ransomware.
