

VIVA

ENCODE, CAPTION & STREAM.

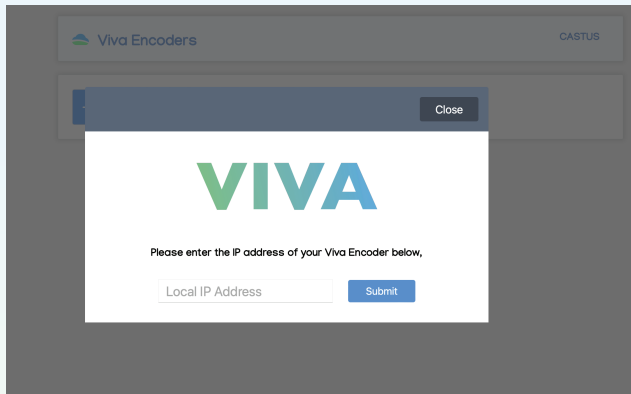

CASTUS

Cloud Services

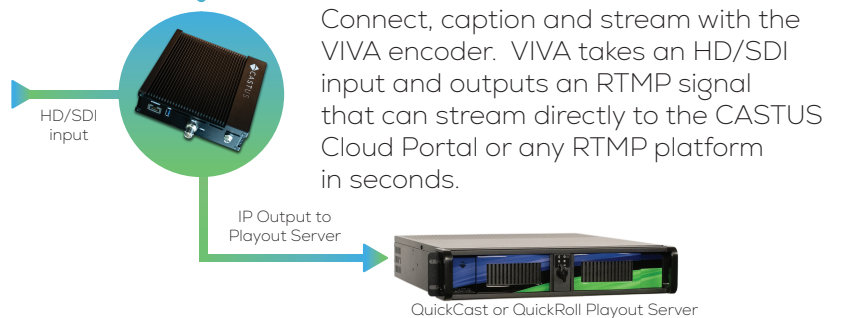

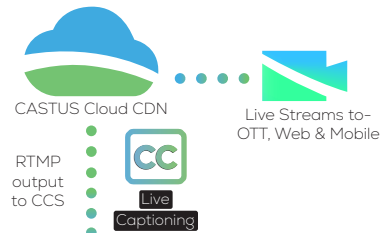

5.5W X 5.5D X 1.5H

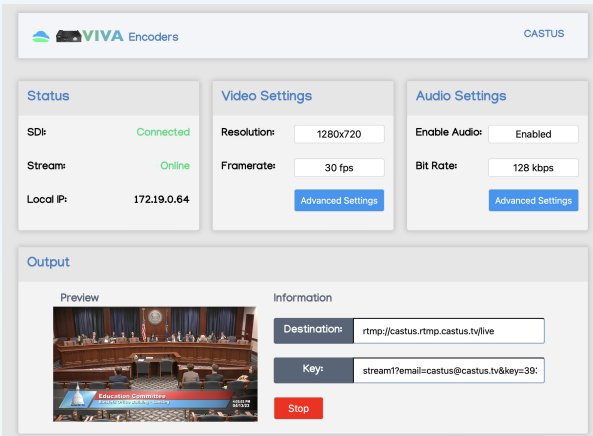

CASTUS VIVA is the first encoder that connects, streams and captions with ease. Its small form factor allows you to be on the go so you can stream any event to the cloud or your playback server without any port forwarding. It's truly plug and play and the only requirement is a stable internet connection. Plug in any HD/SDI feed from a camera or video switcher and stream while captioning your event to the cloud with the touch of a button.

Set up your VIVA to the CASTUS Cloud Portal and stream with captions in seconds.

Connect, caption and stream with the VIVA encoder. VIVA takes an HD/SDI input and outputs an RTMP signal that can stream directly to the CASTUS Cloud Portal or any RTMP platform in seconds.

Monitor your VIVA streams from the CCS Cloud Portal adjust video / audio quality and go live.

VIVA works as a stand alone, simple and easy to use encoder with a web browser portal that gives you the ability to adjust video and audio settings, monitor your live feed and go live to any RTMP platform. Package VIVA with any of the CASTUS Cloud Services to stream, caption live events and record to cloud all without any port forwarding.
