

## CAROUSEL & BRIGHTSIGN

### You Dream it, We Build It

Tightrope and BrightSign have teamed up to bring you the ultimate digital signage solution for a wide variety of large out-of-home network installations by combining the powerful features of Carousel Digital Signage software with the unparalleled performance of BrightSign's XD2 series media players.

### Carousel Digital Signage Software

#### EASY, FAST, EVERYWHERE

Use Carousel Digital Signage Software to get your latest project running right away with ready-made templates, simple scheduling, and access from anywhere in the web-based user interface.

#### IT'S DYNAMIC

Set it and forget it with support for dynamic bulletins from Facebook, Twitter, RSS feeds, iCal, MS Exchange, XML and more.

#### PERMISSIONS ON THE FLY

Manage your whole team from anywhere. Change user roles, permission settings and approve bulletins from anywhere using the web UI

#### READY IN AN EMERGENCY

Always be prepared. In an emergency, override channel displays with full screen alerts that you can send and remove with a single click.

### BrightSign®

#### CHANGE LAYOUTS THROUGHOUT THE DAY

You're free to change it up. Carousel's simple scheduling tool lets you change the channel layout and content on a single screen or on whole groups of screens at various times throughout the day.

#### REMOTE MONITOR & SYSTEM CONTROL

All systems are a go. And you know this because you can check your system status remotely. You can also shut it down if need be using remote monitor control to turn displays on and off.

#### UPDATES ARE A BREEZE

Save yourself some time. Update your server software or firmware and changes will automatically be pushed to all networked players.

#### PLAYERS NEVER FORGET

No power, no problem. Your players will recover gracefully by reloading the channel they were playing just before a power outage, SD card failure, or network connection loss.
