

INTERACTIVE DIGITAL SIGNAGE

Whether you're interested in interactive touch for your school or business, Carousel is capable of doing it all. Create your own interactive websites and upload them right to Carousel, or have us do it for you! Tightrope Creative offers both design and programming services for your very own custom interactive application.

INTERACTIVE MAPS

Guide your visitors to campus buildings and local attractions with interactive maps. Display a list of services or departments at each location and the proper route to get there. You'll typically find one of these applications running on a kiosk at small and large campuses, airports and other facilities in the travel industry.

LEARNING KIOSKS

Use interactive digital signage to help students learn about... well, anything! Perfect in hands-on environments like schools and science museums. Or, you can use it to inform employees of new technologies, anything to make the process of learning easier and more accessible.

BUILDING DIRECTORIES

Allow your visitors to find departments and personnel by browsing your entire directory, or part of your directory. Great for medical and professional buildings, faculty buildings on campus, and even malls.

BENEFITS OF INTERACTIVITY

- **Inform & Engage** Provide accurate and up to date information for your visitors.
- **Cut Costs** Stop printing maps and use interactive signage that can be updated easily.
- **Navigate** Interactive maps and directories allow users to get to their destination quickly and easily without confusion.
- **Educate** Provide your customers with endless amounts of information about your products or company with an interactive display.
- **Self-Service** Give your visitors the resources to quickly and painlessly search your directory, schedule a meeting or learn some information about your business or services.
