### Simplify Your AV Infrastructure

Simplify infrastructure by capturing media to secure RAID protected storage over standard IP networks.

### Centralized Content for Digital Signage

Host, manage, and play your media from a secure and centralized network storage server to video walls on stage, in stadiums, or across campus.

### Campus Wide Recording

Capture every lecture and event on campus to secure high speed storage.

### Improved Production to Post Turnaround

Capture media over IP or SDI and make your content immediately available to editors during event production.

### Review, Manage, and Organize Assets

Use built-in media asset management software to review recordings, tag assets, and log comments against clips from a web browser anywhere on the network.

### Sync, Backup, and Replication

Use built-in data movement and automation tools sync, backup, and replicate media across multiple systems and cloud storage locations to make sure your content is always secure.
