

The NewTek TriCaster® TC1 Deluxe Bundle

- NewTek TriCaster TC1R 2RU Live Production System
- NewTek Connect NC1 IO Studio I/O Module
- NewTek TC1LP Control Panel

The NewTek TriCaster TC1 Deluxe bundle is designed to deliver high-performance, high-capacity production in the new video reality. With industry-leading, software-driven live production technology; a 16-input, multi-source video workflow with support for 12 SDI hardware inputs; and an included 2-stripe control panel with 24 source buttons, the NewTek TriCaster TC1 Deluxe bundle provides the capability, connectivity, and control you need to take on any production.

At a glance

- **Complete Production**
Produce amazing content with hundreds of advanced production capabilities for video switching, playback, mix effects, graphics, audio mixing, virtual sets, and more.
- **4K UHD 60p Capable**
Deliver an immersive viewing experience for programs, performances, events, and sports with native support for true 4K Ultra HD resolution at 60 frames per second.
- **Native IP Processing**
Present your video as it was meant to be seen with NewTek's software-driven processing maintaining native resolution of every signal from input to output.
- **Multi-Source Video Mixing**
Create compelling content using any combination of compatible SDI and IP video sources, including local and remote cameras, mobile devices, Skype video calls, computers, streaming media, video files, graphics, and more.
- **Multi-Destination Delivery**
Produce content for any screen or schedule, with SDI and IP live output, multi-channel recording, multi-platform live streaming, social media publishing, and more.
