

The NewTek TriCaster® TC1 Select Bundle

- NewTek TriCaster TC1R 2RU Live Production System
- NewTek TC1LP Control Panel

The NewTek TriCaster TC1 Select bundle is the solution of choice for modern video production professionals. With industry-leading, software-driven live production technology; a 16-input, multi-source video workflow with out-of-the-box support for four SDI hardware inputs; and an included 2-stripe control panel with 24 source buttons, the NewTek TriCaster TC1 Select bundle is made for modern producers, publishers, and content creators who need complete production with total control.

At a glance

- **Complete Production**
Produce amazing content with hundreds of advanced production capabilities for video switching, playback, mix effects, graphics, audio mixing, virtual sets, and more.
- **4K UHD 60p Capable**
Deliver an immersive viewing experience for programs, performances, events, and sports with native support for true 4K Ultra HD resolution at 60 frames per second.
- **Native IP Processing**
Present your video as it was meant to be seen with NewTek's software-driven processing maintaining native resolution of every signal from input to output.
- **Multi-Source Video Mixing**
Create compelling content using any combination of compatible SDI and IP video sources, including local and remote cameras, mobile devices, Skype video calls, computers, streaming media, video files, graphics, and more.
- **Multi-Destination Delivery**
Produce content for any screen or schedule, with SDI and IP live output, multi-channel recording, multi-platform live streaming, social media publishing, and more.
